Jindara Derwent

Gas Space Heater

Jindara Derwent

Sit back, relax and enjoy dancing flames through the large glass window of the Jindara Derwent. This gas heater has been designed to create the feeling of warmth and ambience of an open fireplace but at the push of a button. Our company has a long and proud history of over 50 years in the Australian heating industry, and we are delighted to add the "Derwent" to our superb range of heaters. Four fascia options are available for you to choose from.

Model No. 221300AJ
Plain Black Fascia

Model No. 221300BJ
Stainless Steel Fascia with Black Door

Model No. 221300DJ
Plain Black Fascia with Polished Chrome Door

Model No. 221300EJ
Stainless Steel Fascia with Polished Chrome Door

Programmable thermostat

The Jindara Derwent includes a programmable thermostat which allows you to control the heat output into your room. Once set, the thermostat will modulate the flames between a high, medium and low setting to ensure your room reaches and remains at your desired temperature.

The thermostat can also be set to turn itself on and off at pre-determined times to ensure that your Star is warming your home when you get up in the morning or arrive home from work in the evening. All by a stylish remote control.

Australian made and owned

The Jindara Derwent is an Australian owned product which was designed in Australia for Australian conditions. Buy Australian made and support Australian manufacturing.

Direct vent/balanced flue technology

The Jindara Derwent uses direct vent technology by drawing outside air through the flue to the firebox, so that the air within your room is not compromised. By using flexible flues, you have three options for flueing your unit.

See the back page of this brochure.

Energy efficient & low running costs

Once you set your thermostat control, your Jindara Derwent will modulate the flame and gas consumption as required to achieve your desired temperature. By not wasting any excess gas, you will help lower the impact on both the environment and your gas bills.

The Jindara Derwent has an energy rating of 5.05 stars.

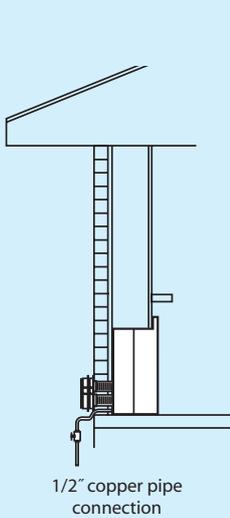

- ★ **Zero Clearance Installation**
- ★ **Gas Input - Natural Gas: 38.0 MJ/h (High) ; 20.0 MJ/h (Low)**
- ★ **Gas Input - Propane Gas: 38.0 MJ/h (High) ; 19.0 MJ/h (Low)**
- ★ **Efficiency 86.5%**
- ★ **Heat Output - Natural or Propane Gas: 9.5kW (High) ; 4.3kW (Low)**
- ★ **Heating capacities will vary depending on room size, ceiling height, windows, insulation and other heat loss factors**

Installation Options

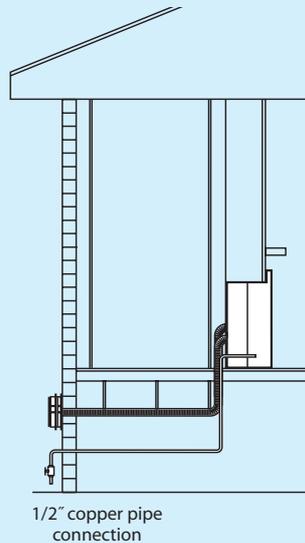

The Jindara Derwent's design allows for simple installation with four easy options.

NOTE: Maximum flue length 4.6m in any application.

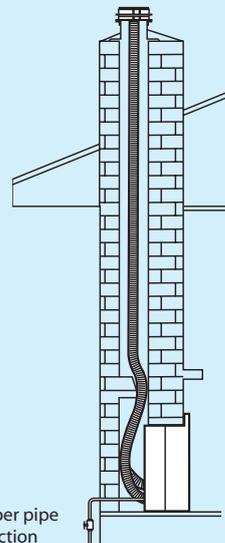

1 Horizontal Application

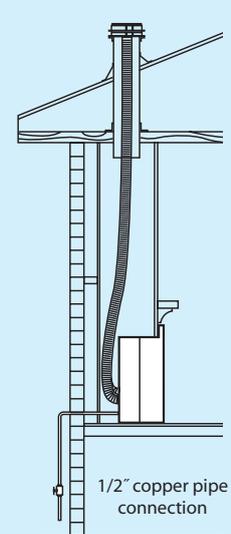

2 Under Floor Application

3 Vertical Application - Chimney

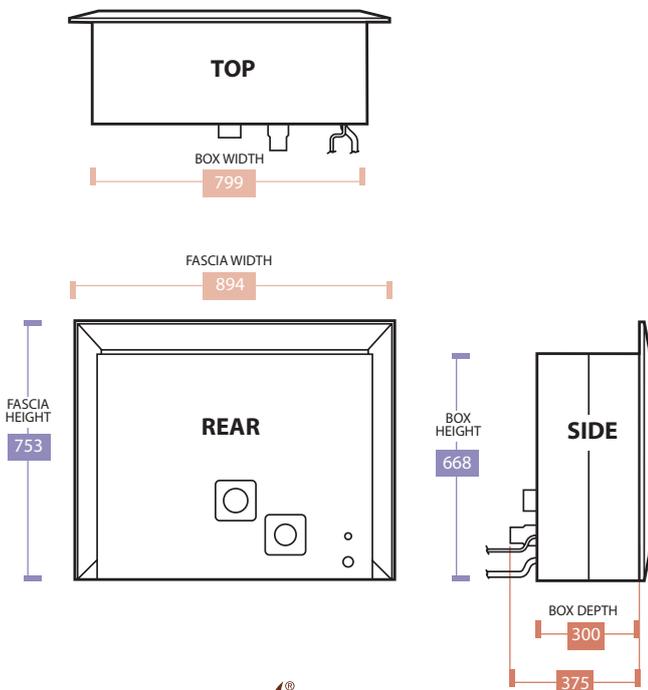

4 Vertical Application - False Fireplace

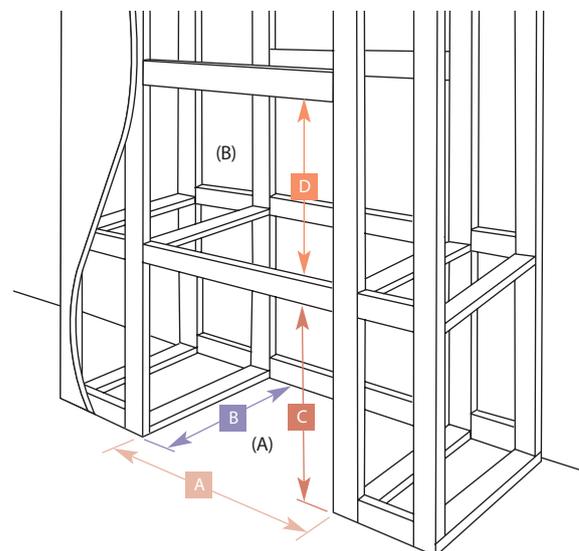

Two fully flexible flues are included. The first is a 50mm diameter pipe to expel gas fumes, whilst the second 60mm diameter flue brings fresh air into the firebox chamber.

Overall Dimensions (mm)

False Fireplace Construction (Zero Clearance) Framing Dimensions (mm)

Heater can be installed at floor level (A), or above floor level (B).
